Professional Summary

Senior IT Systems Administrator with 10+ years of hands-on experience managing enterprise IT infrastructure including Windows Server, Active Directory, networking, and virtualization. Proven track record as a sole IT administrator overseeing end-to-end infrastructure operations - servers, networking, user management, and system security - to ensure absolute reliability and business continuity. Experienced in structured technical support environments utilizing ticketing systems, SLA-driven workflows, and real-time troubleshooting. Currently expanding expertise into Cloud Engineering with Microsoft Azure (AZ-900, AZ-104, AZ-305) and AWS.

Professional Experience

IT Systems Administrator

Osos Engineering Consulting | Remote & Tanta Branch, Egypt | Apr 2025 - Present

- Designed and deployed a complete Active Directory-based infrastructure for 16 employees, including centralized authentication, secure file services, printer deployment, attendance management, backup, and disaster recovery solutions.
- Deployed and administer Windows Server 2025 managing AD DS, DNS, centralized DHCP, and restricted file shares with strict NTFS security models.
- Designed and implemented a resilient network topology via Omada SDN, configuring TP-Link ER605 routers, SG2218P managed switches, EAP620 HD access points, and VLAN segmentation.
- Engineered a comprehensive 4-layer Disaster Recovery strategy: RAID1 software mirroring, Volume Shadow Copies, daily Bare Metal Windows Server Backups, and external backup repositories.
- Configured ZKTeco BioTime 9.0.6 attendance system, syncing MB5000 biometric terminals in real-time.

Technical Chat Support Advisor (Tier 1)

Concentrix | Cairo, Egypt | Nov 2025 - Feb 2026

- Provided real-time Tier 1 technical troubleshooting for international customers ensuring rapid First Call Resolution (FCR).
- Diagnosed and resolved account access, connectivity, and software configuration issues while strictly adhering to SLAs.
- Maintained detailed technical documentation and logged complex technical scenarios in the CRM system with high accuracy to support Tier 2 escalations.

IT Systems Administrator

Green Buildings Foundation | Makkah, Saudi Arabia | Aug 2024 - Dec 2024

- Managed daily IT operations and provided on-site technical support for staff covering hardware, network, and OS issues.
- Maintained network infrastructure uptime by troubleshooting DNS, DHCP, and LAN/WAN connectivity issues effectively.
- Administered Active Directory user accounts - managing permissions, password resets, and file-sharing access controls.

IT Systems Administrator

Modern Designs Office | Makkah, Saudi Arabia | Jun 2015 - Aug 2024

- Sole IT administrator managing the full IT infrastructure independently for 9 consecutive years.
- Administered Windows Server environments and Active Directory Domain Services (AD DS).
- Managed virtualization platforms including VMware and Hyper-V, ensuring high availability.
- Implemented and maintained comprehensive backup and disaster recovery solutions.
- Troubleshot network and system issues ensuring maximum uptime and business continuity.

- Served as primary technical contact for all IT-related operations and vendor communications.
